Professional Summary

Full Stack Developer with hands-on experience building backend systems, APIs, and data-driven applications using Django REST Framework, Java, and SQL databases. Built real-world projects including an Android application used by students and an AI-powered platform with voice-based interaction. Strong in problem-solving, API design, authentication, and data handling, with a practical understanding of software development and testing. Seeking an Analyst / Associate role to contribute to Deloitte's technology and consulting solutions.

Technical Skills

- **Programming Languages:** Python, Java, JavaScript, PHP
- **Web & Application Development:** Django REST Framework, Android
- **Databases & Data Handling:** PostgreSQL, MySQL, SQLite, SQL Queries
- **AI / ML Fundamentals:** Data Preprocessing, Classification, Regression
- **Cloud Fundamentals:** Microsoft Azure (AZ-900 Certified)
- **Tools & Concepts:** Git, REST APIs, JWT Authentication, OOP, MVC

Professional Experience

GEN-AI Virtual Intern	Remote
<i>EduSkills (AICTE & Ministry of Education Program)</i>	<i>Oct 2025 – Dec 2025</i>
• Completed a 10-week virtual internship focused on Generative AI and machine learning fundamentals. • Worked on data preprocessing, basic model workflows, and AI-driven use cases as part of guided assignments. • Gained exposure to cloud-based AI concepts through curriculum designed by AWS Academy. • Strengthened analytical thinking, problem-solving, and technical documentation skills.	

Projects

SkillSwap – AI-Powered Skill Exchange Platform	2025
• Built a full-stack application to support skill discovery, matching, and booking workflows. • Developed RESTful APIs using Django REST Framework to manage users, skills, and availability data. • Integrated Ultravox Voice AI to enable voice-based user interaction for skill search and navigation. • Implemented JWT-based authentication for secure user access. • Worked on data preprocessing and basic matching logic to support skill recommendations. • Tech Stack: Python, Django REST Framework, SQLite, Ultravox Voice AI.	
MyChamber – Subject-Specific PDF Organizer (Android App)	2023-2024
• Developed an Android application to organize academic PDFs based on student-selected courses. • Designed backend workflows for structured data storage and retrieval using SQL databases. • Integrated Firebase authentication and implemented role-based access for admin and users. • Improved usability by simplifying academic resource management for students. • Tech Stack: Java, PHP (CodeIgniter), MySQL, Firebase.	
Cyberbullying Classification Model	2024
• Built a supervised machine learning model to analyze and classify textual data related to cyberbullying. • Performed data preprocessing, feature extraction, and model evaluation. • Applied analytical thinking to interpret results and improve model performance.	

Achievements & Certifications

- **Winner – XHorizon 24-Hour Hackathon (2025)** – Built a full-stack web platform using React, Node.js, and Express with an integrated Aptos-based wallet system; delivered a complete MVP under 24 hours.
- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **Internship in Machine Learning with Python**

Leadership Experience

- **NSS Coordinator & Discipline Committee Head (2022 – Present):** Coordinated student teams for community programs and institutional activities; worked with students and faculty to plan and document initiatives.

Education

B.Tech-Computer Science Engineering (AI & ML Specialization)	Tirupati, Andhra Pradesh
<i>Mohan Babu University</i>	<i>2022-2026</i>
